

## **Work Health and Safety Statement of Commitment**

The Hermitage has developed and made a commitment to protecting the health safety and wellbeing of persons associated with the activities of the Hermitage and have expressed this in the form of a Work Health and Safety Policy that has been signed by the Director.

A signed version of the Work Health and Safety Policy is on display within the Hermitage as a visible sign of the commitment to health and safety within the workplace.

The implementation of the WHS Management System is more than just the words contained in the WHS Policy, it is about developing systems and documented processes that support the framework and provide clear guidance for the way the activities of the Hermitage need to be run in order to protect people within it.
